DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, *"the connector and a casing portion adjacent to the connector form a first size and the slot connector and a casing portion adjacent to the slot connector define a space of a second size and the first size is greater than the second size"* must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.
2. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities:

Page 4, lines 7, 9 and 16 and page 6, lines 2-3, "circuit board 13" should be changed to -- circuit board 2 --.

Appropriate correction is required.

Claim Objections

4. Claims 1-5 are objected to because of the following informalities:

Claim 1, line 7, "the other end" should be changed to -- other end --.

Lines 12 and 13, "casing portion" should be changed to -- a casing portion --

Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-2 and 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Shieh (6,122,175).

Art Unit: 2839

Shieh, figures 2 and 3, discloses a converter for interface card, comprising a casing (10) and a circuit board (40) being encapsulated by the casing, wherein the circuit board comprising:

- a connector (20) at one end to be connected to a connector set of a first interface protocol provided in a computer (1);
- a slot connector (30) at another end to be connected by a connector of a second interface protocol of an interface card (3); and
- wires and electronic components to provide exchange of signals and electricity between a plurality of pins of the connector and a plurality of pins of the slot connector;

wherein the connector and a casing portion adjacent to the connector form a first size and the slot connector and a casing portion adjacent to the slot connector define a space of a second size.

Regarding claim 2, the first size is smaller than the second size.

Regarding claim 4 and 5, the first/second size is size of an Express Card standard connector and the second/first size is size to accept connector of a Card Bus standard interface card.

7. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Georgopoulos et al. (5,457,601).

Georgopoulos et al., figure 3, disclose a converter for interface card, comprising a casing (302 and 304) and a circuit board (103) being encapsulated by the casing, wherein the circuit board comprising:

Art Unit: 2839

- a connector (306) at one end to be connected to a connector socket of a first interface protocol provided in a computer;
- a slot connector (314) at another end to be connected by a connector of a second interface protocol of an interface card (110); and
- wires and electronic components to provide exchange of signals and electricity between a plurality of pins of the connector and a plurality of pins of the slot connector;

wherein the connector and a casing portion adjacent to the connector form a first size and the slot connector and a casing portion adjacent to the slot connector define a space of a second size.

Regarding claim 3, the first size is greater than the second size.
